About Me

My natural curiosity for computers stemmed from an early age and is what drove me towards studying for a degree in Computer Science. I enjoy exploring the unfamiliar and am also curious to learn new skills ranging from different programming languages to Augmented Reality and fitness. I am interested in an opportunity to apply the tools and knowledge I have acquired through my personal projects, professional, and academic career, whilst continuing to further develop and grow my skill set.

Work Experience

Mentorloop | Full-stack Developer

June 2023 - Present | Melbourne, Victoria, Australia

Led the redesign of Group Loop at Mentorloop, enhancing user engagement and experience through project ticket creation, advanced matching logic, and integration of the Mentoring Quality Score:

- Partnered with UX and engineering teams for group search functionality.
- Implemented responsive layouts and streamlined user actions for improved usability.
- Developed and launched a new feature enabling program coordinators to toggle \Self-Match\ for Pro & Enterprise customers.

Nintendo Australia | Junior Front-End Web Developer

May 2022 - November 2022 | Melbourne, Victoria

Junior Front-End Web Developer, my main responsibilities included coordinating global releases of site content whilst engaging with cross-department stakeholders in relation to front-end web development updates and localisation of game pages. I manage priorities in a fast-paced environment and complete tasks in a timely and efficient manner.

Edcursion Technology | Full-Stack Web Developer Intern

3 months internship | Melbourne, Victoria

Junior Full-Stack Web Developer Intern. Worked on many projects and experimented with a lot of technologies using an agile workflow.

Coles Services

Started 2017 - Present | Melbourne, Victoria

Co-managing Coles Services department with tasks including office management, training, recruiting, and onboarding new joiners. Currently working part-time on weekends supporting the team when needed.

Education

Swinburne University of Technology

Bachelor of Computer Science (Software Development) — Attended

Initially pursued a Bachelor of Computer Science, focusing on Software Development. Transitioned out to balance full-time work commitments.

La Trobe University

Diploma of Information Technology (Part-Time)

Currently enrolled and about to complete a part-time Diploma of IT, with goals to continue onto an associate's and bachelor's degree.
